

Cells 1-3 full-sphere double spherical-King component decomposition

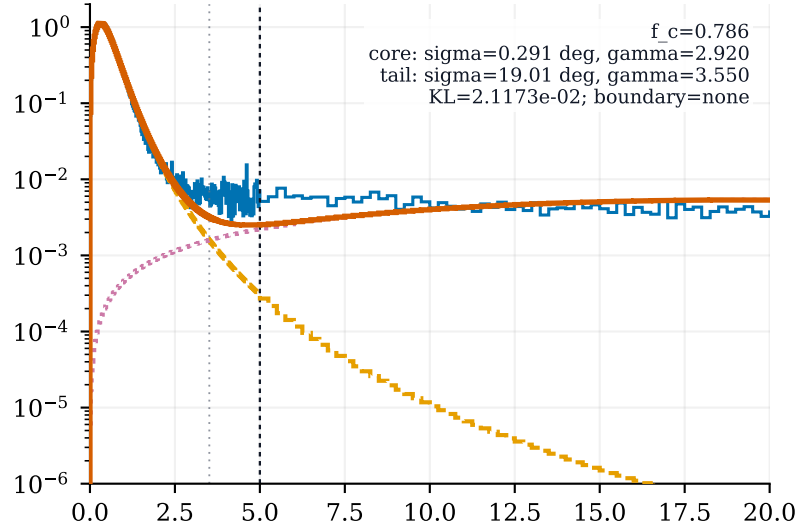

Dashed component curves include their fitted mixture weights and sum exactly to the solid total model.

— weighted raw MC — double spherical-King total - - - weighted core: $f_c K_c$ ····· weighted tail: $(1 - f_c) K_t$ ····· former 5 deg edge

cell 1: Nhit [100,200), predE [2,2.5)

cell 2: Nhit [100,200), predE [2.5,3)

cell 3: Nhit [100,200), predE [3,3.25)
